FOR ARAMCO PROJECT

**KSA**

**WALK IN INTERVIEW**

## **SUPERVISOR – CREW** **Welding & Fabrication**

We are seeking an experienced and qualified Supervisor – Crew for ongoing Aramco project. The ideal candidate should have hands-on knowledge in fabrication and welding operations with the ability to supervise site activities, ensure compliance with Aramco standards and lead multi-skilled construction crews efficiently.

### **Key Responsibilities & Requirements**

The role involves supervising and coordinating daily site activities related to fabrication and welding works, ensuring that all tasks are performed safely, efficiently, and in compliance with Aramco specifications. The candidate should be able to interpret technical drawings, fabrication isometrics, and welding procedures accurately. Monitoring work progress, providing daily updates to the Construction Manager, and coordinating with QA/QC, Safety, and Planning departments are key aspects of the job. Additionally, the role includes verifying that all materials and tools are available and properly utilized by the crew, as well as conducting toolbox talks and enforcing strict safety protocols on site.

The ideal candidate will have a minimum of 4–5 years of experience in construction supervision, preferably on Aramco or similar oil and gas projects, with a strong background in fabrication and welding processes. Familiarity with Aramco work procedures, safety standards, and quality requirements will be a significant advantage. A diploma or technical qualification in Mechanical Engineering or a related field is required, along with good communication skills and the ability to coordinate effectively across departments.

## DATA AND ANALYTICS EXPERT

The Data and Analytics Expert is responsible for performing exploratory data analysis and creating visualizations to gain deeper insights into business data. This role involves developing predictive models, customer segmentation strategies, and executing various analytical tasks to support data-driven decision-making.

### Key Responsibilities

The Data and Analytics Expert is responsible for leading the development of advanced analytics capabilities and business intelligence dashboards to support data-driven decision-making. This includes performing deep data analysis to identify patterns and trends, and developing frameworks for data collection, storage, and governance to ensure data integrity. The role oversees the implementation and maintenance of data tools, including ETL pipelines, cloud platforms, and reporting systems, while ensuring their reliability and availability. They establish data quality and protection standards, design effective data models, and create clear dashboards and reports to communicate insights. Engaging with business teams to align analytics with organizational goals is crucial, as is mentoring junior staff and promoting collaboration. Staying updated with industry trends and maintaining expertise in tools like Python, SQL, cloud technologies, and BI platforms is essential for success.

### Minimum Qualifications

**Degree:** Bachelor's Degree in Computer Science, Management Information Systems (MIS), or a related field.

**Experience:** Minimum of 12 years of relevant experience in data and analytics roles.

### Job-Specific Skills

The ideal candidate possesses strong analytical skills, capable of interpreting complex data and identifying effective solutions. They have extensive experience managing data analytics portfolios and enforcing robust data governance practices. With a proven track record in applying modern data management techniques and tools to large-scale technology initiatives, they excel at driving data strategy and execution. The role requires proficiency in analytics tools and programming languages such as Python, SQL, ETL, cloud platforms, and BI solutions. A deep understanding of data strategy and innovation in analytics is essential. Excellent communication skills are needed to bridge business and IT teams effectively. Creativity, problem-solving abilities, and a high level of self-motivation are key, along with strong prioritization and time management capabilities.

# PROJECT ENGINEER

Manage and deliver multiple projects from concept development to closeout phase within controlled budget and defined schedule. Engage with stakeholders (other departments) to ensure scope clarifications; seek support in reviews of packages, construction, handover and closeout activities.

#### Key Accountabilities

The role entails reviewing project scope and preparing concept packages, as well as supporting MTA scoring sessions for project prioritization. The individual will be responsible for organizing and developing the Projects CAPEX Business Plan on a yearly basis. They will support the respective area projects in the Technical Committee (TCM) for development and implementation approvals. At the initial project phase, they will review the project schedule to ensure proper implementation. Analyzing the schedule, cost, and deliverables to provide corrective actions when necessary is a core responsibility. The candidate must ensure projects run on schedule to meet the target spending plan.

Additionally, they are expected to arrange frequent meetings with MPE Engineering and Construction counterparts to understand project status and address any concerns by escalating to Spirit Meetings or to their Supervisor/Department Manager as needed. Attending regular Spirit Meetings, providing feedback, and seeking support from other Spirit Team members is part of the role. Effective communication and coordination with sponsors and other stakeholders are also required.

#### Qualifications & Experience

Candidates must hold a B.S. degree in Engineering, with PMP certification being preferred. Proficiency in English, both spoken and written, is required. The role demands a minimum of six years of experience in project management, preferably within a refinery setting.

#### Competencies

From a technical perspective, the candidate should possess Level 2 proficiency in Project Planning and Controls, Document Control, and Primavera or similar scheduling tools. On the behavioral and leadership front, Level 3 competency is expected in teamwork, analytical thinking, communication, interpersonal and cultural sensitivity skills, and results focus.

### WALK IN INTERVIEW | SHORTLISTING IN PROGRESS

## ICT PROJECT SPECIALIST

The ICT Project Specialist is responsible for coordinating internal teams and third-party vendors to ensure the smooth and successful execution of ICT projects. The role ensures projects are delivered on time, within scope, and within budget, while maintaining alignment with organizational goals. Responsibilities include developing detailed project scopes and objectives, involving relevant stakeholders, and ensuring technical feasibility. The specialist is accountable for resource planning and allocation, tracking project progress through comprehensive planning tools, and managing changes in scope, schedule, and costs using appropriate control techniques.

They also monitor project performance using defined systems and tools, reporting updates and escalating issues to management when required. Strong relationship management is essential, as the role involves close coordination with clients, internal stakeholders, and external vendors. The ICT Project Specialist is also expected to manage risks proactively and maintain accurate and comprehensive project documentation throughout the lifecycle of each initiative.

#### Minimum Qualifications & Experience

Candidates must possess a Bachelor's Degree in Computer Science, MIS, or a related discipline, with 8-10 years of relevant experience, preferably within the oil, gas, or petrochemical industries.

#### Job-Specific Skills

Ideal candidates should have a proven track record as a project specialist or administrator within the information technology sector. A solid technical foundation, including experience or strong understanding of software development and web technologies, is critical. The role demands excellent communication skills—both verbal and written—and the ability to manage client-facing interactions as well as internal communications effectively. Strong organizational skills, attention to detail, and the ability to handle multiple tasks are vital. Proficiency in Microsoft Office is required, and professional certifications such as PMP or PRINCE II are considered advantageous.

### SENIOR APPLICATION ANALYST

The role involves structuring and prioritizing business requirements and effectively communicating plans with stakeholders for review and approvals. It includes assisting in requirement gathering, developing system designs, and drafting functional specifications. The candidate is expected to provide technical expertise and offer coherent recommendations while assessing projects. They must also identify necessary modifications in existing systems to align with user requirements.

Collaboration is key, particularly with the Project Leader, Data & Analytics team, and ICT team, to ensure that proposed solutions are viable and consistent. This includes ensuring compliance with IT standards, company policies, and procedures throughout the development process to support the delivery of high-quality solutions. Additionally, the role is responsible for preparing status reports and delivering presentations during weekly management meetings. A proactive, can-do attitude is essential, as the candidate may be required to undertake other tasks as assigned by ICT Management.

## **SENIOR DATA ANALYST**

### **Responsibilities:**

The role involves conducting comprehensive requirements gathering sessions with stakeholders to understand their business needs. Based on the collected requirements, the candidate will design effective solutions utilizing SATORP's Business Intelligence (BI) stack. This includes extracting data from various systems such as SQL, SAP BW, and Oracle, and transforming it to enhance quality and simplify understanding for the intended audience. The candidate is expected to adhere to best practices and design principles specific to the BI tools and technology stack being used. A crucial part of the role is streamlining data access, regularly monitoring system logs, and redefining roles where necessary to improve efficiency. The candidate will collaborate closely with data owners and consumers to define the characteristics of high-quality data and ensure these attributes are embedded in processes and systems. Additionally, they will be responsible for managing stakeholder expectations, maintaining open communication, and supporting stakeholders in governing and maintaining data integrity, availability, and quality. The position also requires performing data analysis to assess both quality and relevance, as well as possessing a deep understanding of data integration and modeling.

### **Educational Requirements:**

Bachelor's Degree in Computer Science, MIS, or a related field.

### **Minimum Experience:**

7+ years of relevant experience in data analysis or related roles.

### **Job-Specific Skills:**

The ideal candidate should possess strong mathematical skills to effectively collect, measure, organize, and analyze data. Proficiency in programming languages such as SQL and Python is essential, along with a solid technical background in database design, data modeling, data mining, and segmentation techniques. Familiarity with data visualization tools is important to translate complex data into meaningful insights. The candidate should also have the ability to develop and apply accurate algorithms to datasets in order to uncover valuable solutions. A keen eye for detail and a high level of accuracy are crucial, as is the ability to craft well-structured queries, generate insightful reports, and deliver impactful presentations. Strong teamwork skills, effective verbal and written communication abilities, and proven experience in data analysis and interpretation are key components for success in this role.

#### ▶ CNC MILLING MACHINE OPERATOR

Responsible for setting up, operating, and maintaining CNC milling machines to produce precision parts. Duties include reading blueprints, selecting and installing tools, adjusting machine settings, monitoring operations, inspecting finished products, and troubleshooting issues. Strong knowledge of CNC programming, machining techniques, and attention to detail are essential.

Experience: 1-3 Years

#### ▶ CNC VERTICAL MACHINE OPERATOR

Responsible for setting up, operating, and maintaining CNC vertical machining centers (VMC) to produce precision components. Duties include reading blueprints, selecting tools, setting workpiece coordinates, adjusting machine parameters, monitoring operations, and inspecting finished parts for quality. Strong CNC programming knowledge, machining skills, and attention to detail are essential.

Experience: 1-3 Years

#### ▶ MOLD DESIGNER

Responsible for designing molds for plastic injection, die casting, or other manufacturing processes. Duties include creating 2D/3D designs using CAD software, selecting materials, ensuring manufacturability, and optimizing mold performance. Strong knowledge of mold flow analysis, machining processes, and precision engineering is required.

Experience: 1-3 Years

## REPUTED INDUSTRIAL COMPANY

**WALKIN FOR SHORTLISTING PROGRESS AT MUMBAI & CHENNAI**  
**FINAL CLIENT INTERVIEW ON 01<sup>ST</sup> WEEK OF MAY MUMBAI & CHENNAI**

### POSITIONS

### (MANUFACTURING DIVISION)

#### ► TOOL DESIGNER

Designs tools, dies, jigs, and fixtures for manufacturing processes. Responsibilities include developing detailed blueprints, selecting materials, collaborating with engineers, and optimizing tool performance for efficiency and longevity. Expertise in CAD software and machining techniques is essential.

Experience: 1-3 Years

#### ► QUALITY ENGINEER

Ensures product quality meets industry standards and customer requirements. Responsibilities include developing quality control procedures, conducting inspections, analyzing defects, implementing corrective actions, and collaborating with production teams to maintain quality consistency. Knowledge of ISO standards, Six Sigma, and quality assurance tools is crucial.

Experience: Fresher or one-year experience

Qualification: Diploma or experience in related field

#### ► PLANNING ENGINEER

Responsible for production planning, scheduling, and resource allocation to optimize manufacturing efficiency. Duties include analyzing production requirements, preparing work schedules, coordinating with different departments, and ensuring timely project completion. Strong analytical skills, ERP software knowledge, and problem-solving abilities are essential.

Experience: Fresher or one-year experience

Qualification: Diploma or experience in related field
