WALK IN INTERVIEW SHORTLISTING IN PROGRESS

DATA AND ANALYTICS EXPERT

The Data and Analytics Expert is responsible for performing exploratory data analysis and creating visualizations to gain deeper insights into business data. This role involves developing predictive models, customer segmentation strategies, and executing various analytical tasks to support data-driven decision-making.

Key Responsibilities

The Data and Analytics Expert is responsible for leading the development of advanced analytics capabilities and business intelligence dashboards to support data-driven decision-making. This includes performing deep data analysis to identify patterns and trends, and developing frameworks for data collection, storage, and governance to ensure data integrity. The role oversees the implementation and maintenance of data tools, including ETL pipelines, cloud platforms, and reporting systems, while ensuring their reliability and availability. They establish data quality and protection standards, design effective data models, and create clear dashboards and reports to communicate insights. Engaging with business teams to align analytics with organizational goals is crucial, as is mentoring junior staff and promoting collaboration. Staying updated with industry trends and maintaining expertise in tools like Python, SQL, cloud technologies, and BI platforms is essential for success.

Minimum Qualifications

Degree: Bachelor's Degree in Computer Science, Management Information Systems (MIS), or a related field.

Experience: Minimum of 12 years of relevant experience in data and analytics roles.

Job-Specific Skills

The ideal candidate possesses strong analytical skills, capable of interpreting complex data and identifying effective solutions. They have extensive experience managing data analytics portfolios and enforcing robust data governance practices. With a proven track record in applying modern data management techniques and tools to large-scale technology initiatives, they excel at driving data strategy and execution. The role requires proficiency in analytics tools and programming languages such as Python, SQL, ETL, cloud platforms, and BI solutions. A deep understanding of data strategy and innovation in analytics is essential. Excellent communication skills are needed to bridge business and IT teams effectively. Creativity, problem-solving abilities, and a high level of self-motivation are key, along with strong prioritization and time management capabilities.

WALK IN INTERVIEW | SHORTLISTING IN PROGRESS

PROJECT ENGINEER

Manage and deliver multiple projects from concept development to closeout phase within controlled budget and defined schedule. Engage with stakeholders (other departments) to ensure scope clarifications; seek support in reviews of packages, construction, handover and closeout activities.

Key Accountabilities

The role entails reviewing project scope and preparing concept packages, as well as supporting MTA scoring sessions for project prioritization. The individual will be responsible for organizing and developing the Projects CAPEX Business Plan on a yearly basis. They will support the respective area projects in the Technical Committee (TCM) for development and implementation approvals. At the initial project phase, they will review the project schedule to ensure proper implementation. Analyzing the schedule, cost, and deliverables to provide corrective actions when necessary is a core responsibility. The candidate must ensure projects run on schedule to meet the target spending plan.

Additionally, they are expected to arrange frequent meetings with MPE Engineering and Construction counterparts to understand project status and address any concerns by escalating to Spirit Meetings or to their Supervisor/Department Manager as needed. Attending regular Spirit Meetings, providing feedback, and seeking support from other Spirit Team members is part of the role. Effective communication and coordination with sponsors and other stakeholders are also required.

Qualifications & Experience

Candidates must hold a B.S. degree in Engineering, with PMP certification being preferred. Proficiency in English, both spoken and written, is required. The role demands a minimum of six years of experience in project management, preferably within a refinery setting.

Competencies

From a technical perspective, the candidate should possess Level 2 proficiency in Project Planning and Controls, Document Control, and Primavera or similar scheduling tools. On the behavioral and leadership front, Level 3 competency is expected in teamwork, analytical thinking, communication, interpersonal and cultural sensitivity skills, and results focus.

SENIOR APPLICATION ANALYST

The role involves structuring and prioritizing business requirements and effectively communicating plans with stakeholders for review and approvals. It includes assisting in requirement gathering, developing system designs, and drafting functional specifications. The candidate is expected to provide technical expertise and offer coherent recommendations while assessing projects. They must also identify necessary modifications in existing systems to align with user requirements.

Collaboration is key, particularly with the Project Leader, Data & Analytics team, and ICT team, to ensure that proposed solutions are viable and consistent. This includes ensuring compliance with IT standards, company policies, and procedures throughout the development process to support the delivery of high-quality solutions. Additionally, the role is responsible for preparing status reports and delivering presentations during weekly management meetings. A proactive, can-do attitude is essential, as the candidate may be required to undertake other tasks as assigned by ICT Management.
