# WE ARE HIRING

We are currently looking for:

## SENIOR BIM CORDINATOR

ID: AIC/Hiring/BD&M/0058/2025

### Role Description:

- Experience in working with both consultants/contractors is preferable.
- Proficiency in ISO19650 parts and BIM processes is a must.
- Technically capable of producing and managing LOD 300, 400 & 500 BIM models.
- Will ensure construction documents accuracy based on discipline BIM modelling and the collaboration and coordination with other disciplines for design-changes and model challenges.
- Monitor and validate As-Built model tagging with all related project documents e.g. The H&S file(s) and O&M manual(s) etc.
- Manage federated model setups for interdisciplinary review and clash resolution.
- Perform clash detection, model coordination, and issue resolution using advanced BIM software and tools.
- Implement BIM execution plans, workflows, protocols, and quality control measures for each project in line with the stakeholders BIR.
- Coordinate and collaborate with project stakeholders to align BIM deliverables with project requirements and expectations.
- Conduct regular BIM coordination meetings to resolve clashes and ensure model accuracy.
- Prepare own discipline model and/or content for internal reviews and coordination meetings.
- Support project Manager in day-to-day BIM implementation activities.
- Support contractor BIM team with planning and construction activities with proposed 4D sequencing model(s) review and progress reporting.
- Provide progress and performance updates to project manager on fortnightly and monthly basis.
- Record, store and maintain all formal correspondences related to BIM activities.
- Must have solid understanding CDE platforms like BIM 360/ProjectWise, ACC.
- Monitor and support the data collection process and validate Asset Information Model (AIM) with Computerized Maintenance Management System (CMMS) requirements for eg. Construction Operation Building Information Exchange (COBIE) and/or client specific requirements.
- Ensure Project Information Model (PIM) are delivered in accordance with the agreed TIDP, MIDP and CDE protocol.
- Collaborate and coordinate with the Project manager design-changes and model challenges.
- Work closely with the Project Manager to support the in-house architectural, general engineering, and civil design discipline teams with day-to-day and long-term duties, tasks, and training.

### Qualifications:

- A degree, ideally in Architecture, Structure, Mechanical or equivalent.
- ADNOC Experience is preferable
- A minimum of 10 years BIM experience.
- Proven building project experience.
- Manage / Update BIM Project Documents.

## SRACO KSA

### WALK IN INTERVIEW | SHORTLISTING IN PROGRESS

## ICT PROJECT SPECIALIST

The ICT Project Specialist is responsible for coordinating internal teams and third-party vendors to ensure the smooth and successful execution of ICT projects. The role ensures projects are delivered on time, within scope, and within budget, while maintaining alignment with organizational goals. Responsibilities include developing detailed project scopes and objectives, involving relevant stakeholders, and ensuring technical feasibility. The specialist is accountable for resource planning and allocation, tracking project progress through comprehensive planning tools, and managing changes in scope, schedule, and costs using appropriate control techniques.

They also monitor project performance using defined systems and tools, reporting updates and escalating issues to management when required. Strong relationship management is essential, as the role involves close coordination with clients, internal stakeholders, and external vendors. The ICT Project Specialist is also expected to manage risks proactively and maintain accurate and comprehensive project documentation throughout the lifecycle of each initiative.

#### Minimum Qualifications & Experience

Candidates must possess a Bachelor's Degree in Computer Science, MIS, or a related discipline, with 8-10 years of relevant experience, preferably within the oil, gas, or petrochemical industries.

#### Job-Specific Skills

Ideal candidates should have a proven track record as a project specialist or administrator within the information technology sector. A solid technical foundation, including experience or strong understanding of software development and web technologies, is critical. The role demands excellent communication skills—both verbal and written—and the ability to manage client-facing interactions as well as internal communications effectively. Strong organizational skills, attention to detail, and the ability to handle multiple tasks are vital. Proficiency in Microsoft Office is required, and professional certifications such as PMP or PRINCE II are considered advantageous.
