Leading Contracting Company in Saudi Arabia

Long Term Contract

LEAD ENGINEER

ELECTRICAL & INSTRUMENTATION

- Bachelor Degree in Instrumentation/Electronics/Electrical Engineering
- Certificate courses on AutoCAD, PDMS, SP3D etc.
- Minimum of 10 years working experience from reputed engineering consultant
- organizations or, preferably, at shop / field manufacturing facilities, in the design of various Oil & Gas Skids, Metering Skids, and Modular units.

Candidates with previous experience at **Godrej & Boyce Manufacturing Co. Ltd.** or **Isgec Heavy Engineering Ltd.** will be preferred.

- In-depth knowledge of modular equipment (chemical injection, metering, oil & gas process packages).
- Detail engineering of field & control room instrumentation.
- Well-versed with IEC, API RP 500, CENELEC, ASME, NACE, ANSI, GOST, SNIP, ROK standards.
- Familiar with Shell DEP, Saudi Aramco SAMSS, ADMA, GASCO, TAKREEER, NCOC standards.
- Engineering, testing & commissioning of DCS, ESD, HIPS, WSD, PLC, SCADA systems.
- Skilled in lighting panels, switch racks, power/distribution panels, cable tray/trench routing.
- Participated in HAZOP, SIL studies & safety system life-cycle processes.
- Ensure technical accuracy of P&IDs and compliance with industry/project standards.
- Prepare key engineering documents: instrument index, loop diagrams, I/O list, cable schedule, etc.
- Ensure design operability, maintainability, and safety in line with local laws and client standards.
- Coordinate engineering progress with client teams to meet scope, schedule, and procedures.
- Review vendor/shop drawings and inter-discipline documents for technical alignment.
- Collaborate across disciplines for control system interface consistency.
- Provide on-site support for installation, commissioning, and troubleshooting.
- Actively involved in IFAT, FAT, SAT to minimize punch lists and improve system performance.

DATA CATALOGUERS

30 NOS

The candidate must possess the knowledge, experience, and skills necessary to manage cataloguing and materials engineering functions within the Oil and Gas or Petrochemical industries. A Bachelor's degree or diploma in a relevant engineering discipline is required, along with a minimum of 10 years of progressive experience in this field. The candidate should have hands-on experience with SAP MDG and SAP MM modules and a proven track record in implementing service master, material master, or enterprise asset management systems in a cataloguing role. A strong understanding of UNSPSC and other leading industry classification standards for materials and services is essential. The individual must be capable of working independently with minimal supervision, demonstrate strong analytical thinking, and possess advanced skills in Excel and data manipulation to effectively handle and manage cataloguing activities.

SENIOR ELECTRICAL PROTECTION ENGINEER

30 NOS

Education and Experience

Bachelor's degree in Electrical Engineering or a related field with a minimum of 12 years in the Oil and Gas industry, including at least 8 years as a Protection Engineer. Experience in power plants is preferred. Strong knowledge of electrical safety rules, switching programs, and PTW regulations. Skilled in testing and inspection of LV and HV switchgear (AIS & GIS), and experienced with testing equipment like CMC356, Fluke power analyser, and CPC100. Proficient in working with a wide range of relays and breakers (ABB, Siemens, Schneider, etc.) and relay software such as ETAP, DigSILENT, DIGSI, and PCM. Strong English communication skills, team player, with the ability to mentor junior staff. Familiar with ERP systems and MS Office applications.

Role Summary

Perform routine testing of protection relays and switchgear, and support commissioning of new systems. Diagnose faults, update relay settings, and maintain protection system documentation. Provide on-the-job training to OLN staff, plan and schedule relay testing, and ensure up-to-date backups. Support system upgrades and foster a transparent technical culture. Focus on minimizing repair time and maximizing equipment reliability.

LONG TERM EMPLOYMENT

WALK IN INTERVIEW

Education and Experience

The candidate must hold a diploma or equivalent qualification, with preference given to those with a background in Supply Chain Management or a related field. They should have over 5 years of experience in the Oil and Gas industry, specifically working with procurement and ERP systems. The individual should have strong communication and interpersonal skills, a solid understanding of inventory control methods, and the ability to read and interpret technical specifications and drawings. Proficiency in Microsoft Office, especially Excel and Word, along with ERP software, is essential. A high level of accuracy, attention to detail, and the ability to work both independently and as part of a team are key attributes.

Role Summary

Responsibilities include ensuring proper storage and handling of materials in compliance with quality and safety standards, and monitoring supply chain transactions to prevent stockouts. The candidate coordinates with logistics providers and internal departments to ensure timely deliveries and accurate stock levels. They provide reliable forecasts and reports to support management decisions, efficiently handle stock discrepancies and quality issues, and maintain up-to-date knowledge of products and delivery processes. The role involves managing the inward and outward flow of inventory, including goods receiving, stock handling, location tracking, and cycle counting. The candidate ensures stock accuracy using FIFO principles and maintains batch and location integrity within the company's software. Additionally, they are responsible for preparing and coordinating purchase material requests through the ERP system.

LONG TERM EMPLOYMENT

WALK IN INTERVIEW

Education and Experience

The candidate holds a Bachelor's degree in Mechanical Engineering with over 10 years of experience in the Oil and Gas industry. They have extensive knowledge in shutdowns, maintenance, projects, and construction, particularly within the Saudi oil and gas sector. The individual possesses strong communication skills, proficiency in MS Office and Primavera P6, and solid organizational and time management abilities. Their background includes mechanical maintenance, shutdown planning and execution, project management, and data analysis. They bring leadership, teamwork, and problem-solving capabilities, along with experience in construction or engineering projects.

Role Summary

The candidate is responsible for developing and maintaining detailed project schedules, coordinating with project managers to define scope and objectives, and monitoring project progress with resource loading updates. They identify risks, prepare mitigation strategies, and assist in budgeting and resource allocation. Responsibilities include preparing reports for stakeholders, ensuring safety and regulatory compliance, conducting site visits, analyzing project data for trends, and collaborating with suppliers and contractors. Proficient in Primavera, the candidate uses software to track timelines, manage delays, review subcontractor plans, and facilitate team communication. They also oversee project performance, progress, and cash flow development, while supporting invoicing and accounting processes. Additional duties involve budget variance tracking, cost code review, managing project status reports, change order analysis, and maintaining accurate cost control systems to provide financial insights to both project and company management.

LONG TERM EMPLOYMENT

WALK IN INTERVIEW

Education and Experience

The candidate holds a BSc degree in Engineering Science with a specialization in Instrumentation or Electronics and has a minimum of 4 years of experience in the oil and gas industry, with at least 2 years in a senior project engineering role. They possess a solid command of the English language, equivalent to IELTS level 4, and have strong problem-solving and analytical skills relevant to their field. Their experience includes project scope definition, cost-benefit analysis, execution and implementation planning, commissioning, and post-implementation reviews. The candidate demonstrates critical thinking and the ability to assess alternative solutions logically. They have expertise in control and automation, electrical engineering, planning and scheduling, maintenance execution, control systems (ICS/SCADA), computer maintenance, and cybersecurity. Additionally, they are committed to meeting organizational HSE targets and conducting timely quality audits.

Role Summary

Responsibilities include planning, organizing, and executing preventive and corrective maintenance for PCD-IT equipment, responding to PCD priority call-outs after working hours, and advising remediation plans in line with OmanLNG procedures. The candidate is responsible for updating PCD documentation such as inventory, backup and restoration logs, user audits, and routine checklists. They support the preparation of design specifications and drawings for PCD cybersecurity-related projects and track planned maintenance in coordination with stakeholders. They also help raise awareness of PCD cybersecurity within the OmanLNG community and ensure all activities comply with HSE policies and procedures. Additional duties include developing work instructions, inspection and testing schedules, contributing to quality assurance, and preparing progress, cost tracking, and financial reports. The candidate introduces tools and systems to enhance the complex's operational availability and follows up on the progress of all assigned projects.
